Key Points: Real time reports for material tracking, Improvement in Resource utilization & Better efficiency, Project status monitoring & Real time reporting, Better inventory control with project budgeting

We were searching for an implementor who could clearly understand our complex processes and help us map them to **SAP best-practices**. This is where the Nexeons team stood out.

We had a **seamless** SAP implementation and the Nexeons team continues to support us in our future feature additions to our ERP system.”
