*A leading multinational Consumer Goods Company*

It is a multi-product, multi-channel organization which provides water purification devices, vacuum cleaners, air purification systems, and home security products

# The Story: Migration of SAP Landscape to MS Azure

## The Challenges

- Very large Database size and Data footprint
- Various Interfaces and Integrations Touchpoints
- Non-Unicode Systems at source
- Different Hardware Platform Environments at On-Premise & Azure
- Difficult to get long downtime due to 24x7 Operations

## The Solution

- Dynamic Scalable Hardware Sizing done to accommodate peak loads during various business cycles
- Mix of Pay as you Go & Reserved Instances for TCO Reduction
- Use of PaaS & SaaS Services for improving overall performance and application uptime
- Backup & DR Strategy in-line with Business Requirements

## The Result

- Better Performance and no resource bottlenecks
- Unified Backup Strategy
- Better Uptime for Business Applications
- Reduced time to implement new infrastructure from months to hours

Our journey of migration of our Tier-1 IT ecosystem - SAP, into the cloud has been a **seamless** exercise with Nexeons.

With clear understanding of the technology, diligent planning and professional aptitude for continual improvement, our SAP systems migration into the cloud was **flawless**.

- Sr. Vice President & CIO
