

Seamless Migration to GCP

A Leading Technology Company

Seamless Migration to GCP with SAP HANA 2.0 Upgrade

An industry-leading integrator of **Digital Networks**

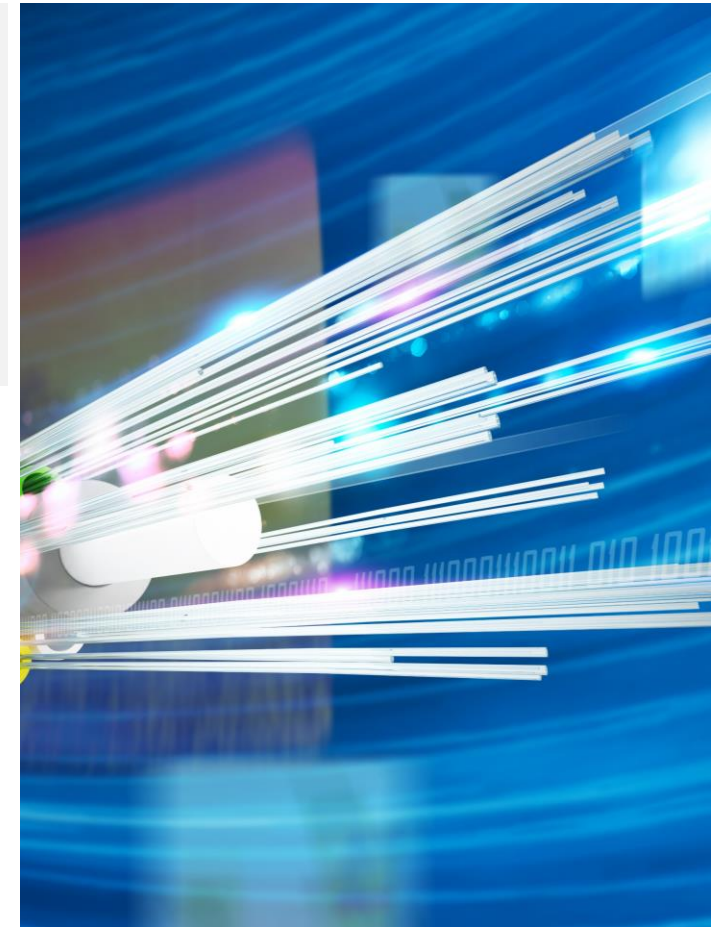

Revenue: **USD 736mn**

Employee: **3100+**

Manufacturing Plants: **7**

Presence: **16 Countries**

A leading Technologies companies with offices in the USA, Europe, Southeast Asia, Middle East, China and India, which provides fully 5G ready digital network solutions help telcos, cloud companies, citizen networks and large enterprises deliver enhanced experiences to their customers.

The Story

Customer Challenges:

- Ageing Hardware and end of Life for HANA Database Version
- Performance Issues on existing Hardware
- Connectivity from 50+ Locations using various Connectivity Solutions
- Bottlenecks in existing Infrastructure Platform for Digital Transformation Initiatives

How we have helped them:

We have helped the customer right size their to-be landscape on GCP to build an optimised, commercially viable solution without any compromise on Performance. We have also made sure that the proposed solution was in line with various Compliance Requirements of the customer organization around Security, Backups and Business Continuity.

What we have implemented: The Solution

- SAP Business Suite on HANA (ECC) on Google Cloud Platform
- HANA Backup using GCP Backint API
- Stackdriver Monitoring
- Integration with various SAP and Non-SAP Data Sources.

The Result:

- Seamless Migration to GCP with prior testing of various interfaces and integrations
- Upgrade to HANA Database 2.0 Platform as a part of Migration
- Cost Optimised SAP DR Setup with Improvement in overall RTO / RPO
